

Aspen and Spruce defoliators' population and their associated parasitoids

Lead by: Louis Morneau

Theme: Arthropod Diversity

Status: Completed

Start: 1998

End: 2002

Participants

- David Langor
- Louis Morneau
- John Spence
- Jan Volney
- Julia Wesley

Background

n/a

Objectives

To identify defoliators associated with aspen and spruce; to identify their parasitoids and the parasitism rate of a few major pests; to link defoliators' population in the canopy with light trapping study.

Key Results
