

Forest Mensuration and Health

Lead by: David Langor

Theme: Productivity

Status: Continuing

Start: 1998

Participants

- David Langor
- Ken Mallet
- Colin Myrholm
- John Spence
- Brad Tomm
- Jan Volney

Background

Insect and diseases are major natural determinants of the structure of natural stands. They cause growth loss and mortality.

Objectives

To determine the health condition of standing trees in all EMEND compartments.
